Guitar Speakers

PEACEKEEPER

Revolutionary New Attenuating Speaker Technology

12in 305mm | **50W** Watts | **8** Ohm | **86** dB

The Peacekeeper is a revolutionary new attenuating speaker for guitarists from Celestion. It's the simplest and most toneful way of being able to dial your amplifier right up to its "sweet spot", while keeping the decibel levels down. Featuring a unique dual voice coil design, this attenuating speaker works together with an amp, like a conventional guitar speaker, only with significantly reduced output sensitivity. Enabling you to drive your amplifier harder while still listening at reasonable volume levels. Load it into your cab and the Peacekeeper will attenuate your amplifier in the most natural way possible, with zero additional colouration or tonal compromise.

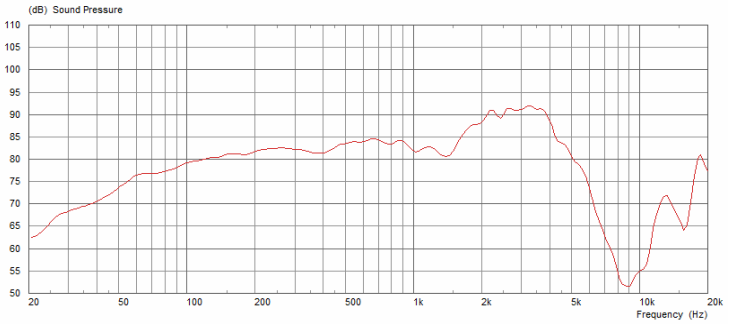
General Specifications

Nominal Diameter	305mm / 12in
Power Rating	50W
Rated impedance	8 ohm
Sensitivity	86dB
Chassis type	Pressed Steel
Magnet type	Ceramic
Magnet weight	1.42kg / 50oz
Frequency range	75Hz-5000Hz
Resonance frequency Fs	80Hz

Mounting Information

Cut-out diameter	283mm / 11.1in
Diameter	309mm / 12.2in
Magnet structure diameter	6.14in / 156mm
Mounting hole dimensions	7.9mm / 0.31in
Mounting hole PCD	297mm / 11.7in
Number of mounting holes	8
Overall depth	144mm / 5.67in
Unit weight	4.9kg / 10.8lb

8 ohm Frequency response



Celestion, Claydon Business Park, Great Blakenham, Ipswich, IP6 0NL United Kingdom
