Peacekeeper

Revolutionary New Attenuating Speaker Technology

The Peacekeeper is a revolutionary new attenuating speaker for guitarists from Celestion. It's the simplest and most toneful way of being able to dial your amplifier right up to its "sweet spot", while keeping the decibel levels down. Featuring a unique dual voice coil design, this attenuating speaker works together with an amp, like a conventional guitar speaker, only with significantly reduced output sensitivity. Enabling you to drive your amplifier harder while still listening at reasonable volume levels. Load it into your cab and the Peacekeeper will attenuate your amplifier in the most natural way possible, with zero additional colouration or tonal compromise.

General Specifications

Nominal Diameter 305mm / 12in

 $\begin{array}{ll} \text{Power Rating} & 50\text{W} \\ \text{Rated impedance} & 8~\Omega \\ \text{Sensitivity} & 86\text{dB} \end{array}$

Chassis type Pressed Steel Magnet type Ceramic

Magnet weight 1.42kg / 50oz Frequency range 75Hz-5000Hz

Resonance frequency Fs 80Hz

Mounting Information

Cut-out diameter 283mm / 11.1in
Diameter 309mm / 12.2in
Magnet structure diameter 6.14in / 156mm
Mounting hole dimensions 7.9mm / 0.31in
Mounting hole PCD 297mm / 11.7in

Number of mounting holes

Overall depth 144mm / 5.67in Unit weight 4.9kg / 10.8lb

8 Ω Frequency response
