

G12H-150 Redback

The G12H-150 Redback has been created for players who are looking for extreme power handling but refuse to compromise on great tone. Rated at a gargantuan 150-watts, the Redback is constructed with a supersized 2-inch voice coil and features the heaviest G12 magnet. The result is a guitar speaker that sounds 100% Celestion in character, yet is primed to withstand a pummelling from a 100-watt head all by itself, and still come back for more. The Redback proves that you no longer need to choose between power and tone. With a tight, well-controlled low end, detailed midrange and more relaxed treble, Celestion's engineering expertise has produced a truly high power guitar speaker that can still deliver balance, responsiveness and superb playability, with muscular ease. With lower power combos, expect tons of smooth, clean tone and don't be afraid to plug in your favourite stomp box. Thinking of downsizing your cabinet? Simply hook up a single Redback to your 100-watt head and generate giant slabs of frightening, monstrous tone.

8 Frequency Response

General Specifications

Nominal diameter	12", 305mm
Power rating	150W
Nominal impedance	Available in 8 or 16
Sensitivity	100dB
Chassis type	Pressed steel
Voice coil diameter	2", 50mm
Magnet type	Ceramic
Magnet weight	50oz, 1.42kg
Frequency range	70-5000Hz
Resonance frequency, Fs	75Hz
Voice coil former material	Round copper

Mounting Information

Cut-out diameter	11.1", 283mm
Diameter	12.2", 309mm
Magnet structure diameter	6.6", 168mm
Mounting slot dimensions	0.31", 7.9mm
Mounting slot PCD	11.7", 297mm
Number of mounting slots	8
Overall depth	5.4", 138mm
Unit weight	10.4lb, 4.7kg
