

NEW

# 100% CELESTION TONE

ONLY QUIETER

**CELESTION**

A REVOLUTIONARY NEW ATTENUATING GUITAR SPEAKER

# NEW PEACE KEEPER

**The Peacekeeper is a revolutionary new attenuating guitar speaker from Celestion. It's the simplest and most toneful way of being able to dial your amplifier right up to its sweet spot, while keeping the decibel levels down.**

As any guitar player knows, a great amp sounds at its best when you turn it up loud. Unfortunately that's not always possible, which is why Celestion designed the Peacekeeper. Featuring a unique dual voice coil design, this attenuating speaker works together with an amp, just like a conventional guitar speaker, only with significantly reduced output sensitivity. Enabling you to drive your amplifier harder while still listening at reasonable volume levels.

Load it into your cab and the Peacekeeper will attenuate your amplifier in the most natural way possible, with zero additional colouration or tonal compromise.

**Simply 100% Celestion tone... just quieter.**

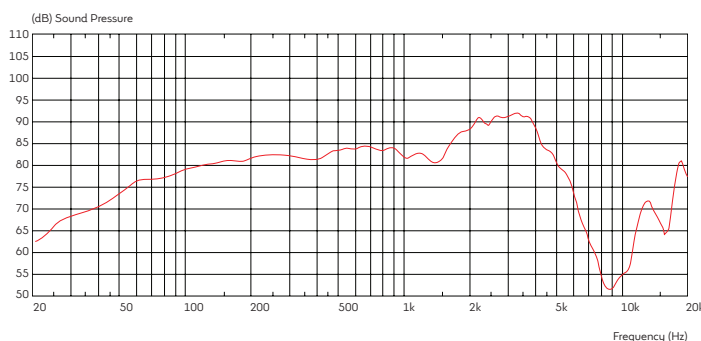

## GENERAL SPECIFICATIONS

Nominal diameter	12", 305mm
Power rating	Strictly 50W Maximum
Nominal impedance	8Ω
Low sensitivity	86dB
Chassis type	Pressed steel
Magnet type	Ceramic
Magnet weight	50oz, 1.42kg
Frequency range	70-5000Hz
Resonance frequency, Fs	80Hz

## MOUNTING INFORMATION

Cut-out diameter	11.1", 283mm
Overall Diameter	12.2", 309mm
Magnet structure diameter	6.14", 156mm
Mounting hole diameter	0.31", 7.9mm
Mounting bolt circle diameter	11.7", 297mm
Number of mounting holes	8
Overall depth	5.67", 144mm
Unit weight	10.6lb, 4.8kg

## FREQUENCY RESPONSE
